televac_br5002 rev A

Controllers

- 1×10^{-11} to 9900 Torr maximum range
- Up to 10 sensors with one controller
- RS-232/485 communications
- 0 to 10 V analog outputs
- Set point relays
- Full range measurement from atmosphere to UHV with automatic control of high vacuum sensors
- Portable units

Active Gauges

- Sensor and controller combined in a single unit with a display
- RS-485 communications
- 0 to 10 V analog outputs
- Set point relays and open collector outputs
- CE certification

Sensors

- Piezo diaphragm, thermocouple, convection, cold cathode, and hot ion

Why Televac?

- Our technical support is unmatched in the industry
- Contact us by phone, email, or through the new chat feature on our website
- USA based manufacturer
- Products with diverse features that are simple to integrate
- Products designed for the future of vacuum measurement
