

Analog/PWM Signal Conditioner for Electrolytic Tilt Sensors

Part Number: 1-6200-007

Physical Characteristics	
Housing	None
Electrical Connections	7 Pin, 2.54 mm (0.1") spacing
Weight	4 g
Length	32 mm (1.25")
Width	32 mm (1.25")
Hole Center	27 mm (1.05")

Ordering Information		
Part Number	Description	
1-6200-007	Signal Conditioner, 1 or 2 Axis, Analog/PWM	

Compatible With	
Part Number	Description
0717-4313-99	Tilt Sensor, ±50°, 2 Axis
0717-4315-99	Tilt Sensor, ±60°, 2 Axis
0717-4318-99	Tilt Sensor, ±60°, 2 Axis
0717-4319-99	Tilt Sensor, ±50°, 2 Axis
0717-4321-99	Tilt Sensor, ±40°, 2 Axis
0717-4322-99	Tilt Sensor, ±45°, 2 Axis
0717-4323-99	Tilt Sensor, ±50°, 2 Axis
0703-1602-99	Tilt Sensor, ±25°, 1 Axis
0703-0711-99	Tilt Sensor, ±3°, 1 Axis

Related Products	
Part Number	Description

Description

The 1-6200-007 analog/PWM signal conditioner can be used with any Fredericks electrolytic tilt sensor. This signal conditioner can be connected to a dual-axis tilt sensor or 1 or 2 single-axis tilt sensors to provide single or dual-axis position measurement over the sensor's range.

Fredericks 0717 series wide range tilt sensors can be mounted directly to the PCB for a complete inclinometer solution. Single-axis sensors must be mounted externally to the PCB and connected with wires.

Key Features and Benefits

- Very low power consumption
- Simple integration into a new or existing design
- Excellent resolution and repeatability of measurements
- -40 °C to 85 °C operating temperature for industrial applications
- Live text and video chat technical support

Applications

- Recreational vehicle (RV) leveling systems
- Geotechnical and structural monitoring
- Construction tools, laser leveling
- Construction machinery and equipment

View the full list at www.frederickscompany.com/markets.

Analog Output Description	
$V_{dd} = 3.3 \text{ V DC}$	0 V DC to 3.3 V DC, 0° tilt = 1.65 V DC
$V_{dd} = 5.0 V DC$	0 V DC to 5 V DC, 0° tilt = 2.50 V DC

Note that the analog output is integrated from the PWM output and this circuit will be sensitive to moisture. An enclosure or conformal coating may be necessary in higher humidity environments.

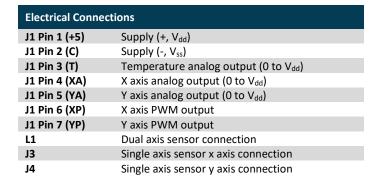

PWM Output Description	
Frequency	122 Hz
Duty Cycle	1% to 99%, 0° tilt = 50% duty cycle
Resolution	16 bits

Analog/PWM Signal Conditioner for Electrolytic Tilt Sensors

Part Number: 1-6200-007

Converting Temperature Values

The board temperature output is an analog output (0 to V_{dd}). To convert that value to a temperature in °C, use the following equation:

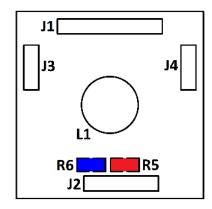

Temperature in °C = (output - 0.5)/0.01

Board Configuration

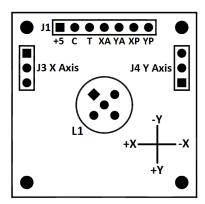

The 1-6200-007 signal conditioner can be configured to operate one dual-axis sensor or two single-axis sensors. Dual-axis sensors can be mounted directly to the board, whereas single-axis sensors must be mounted off the board and connected with wires.

The board must be configured for either dual-axis sensors or singleaxis sensors. This configuration is is determined by the resistor values of R5 and R6.

- For a dual-axis sensor: R5 (red) is 10 k Ω , R6 (blue) is not installed (open circuit). The sensor is connected to L1.
- 2. For single-axis sensors: R5 (red) is not installed (open circuit), R6 (blue) is 1 k Ω . Sensors are connected to J3 and J4.

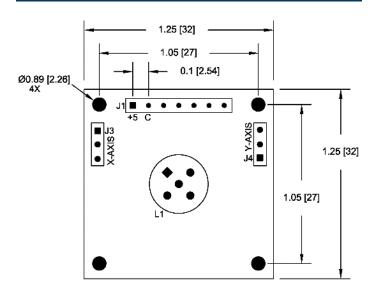

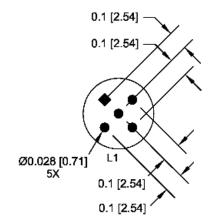

Pin Diagram and Direction of Measurement

Note that the direction of measurement only applies when a dual axis sensor is mounted

Certifications and Ratings

RoHS Compliant

Company Information

Specialty Manufacturing Services That Promise Precision - Since 1935, The Fredericks Company has been a global provider and U.S. designer and manufacturer of the highest performance tilt and vacuum measurement products on the market, with manufacturing processes that ensure the reliability of our products.

Tilt Measurement Products and Sensors That Set Standards - Fredericks' comprehensive tilt measurement product portfolio offers electrolytic tilt sensors, inclinometers, and tilt switches. Engineered to outperform competing technology, our tilt sensors are accurate and repeatable with excellent resolution. Our tilt measurement products have no planned obsolescence and serve industries ranging from construction and RV leveling to aerospace applications and everything in between.

A Partnership That Prioritizes Uptime, Lead Time, and Service - Fredericks guarantees customer satisfaction and our "not too big, not too small" operation is what enables us to offer a true partnership experience. Our dedicated representatives and engineers offer exceptionally responsive service and the fastest lead times in the industry, knowing that uptime is the key to your success. With anytime access to our leadership team and solutions that enhance your products, you will feel the Fredericks difference.
