

±25° UART/TTL Dual-Axis Inclinometer

Part Number: F225-00T-003-01

Physical Characteristics	
Housing	None
Electrical Connections	8-pin Molex 1054291308
Mating Connector	8-Pin Molex 1053081208
Weight	20 grams
Length	45 mm (1.78")
Width	45 mm (1.78")
Height	17 mm (0.65")

Orde	ering I	Inform	ation

Description

The F225-00T-003-01 UART/TTL inclinometer utilizes Fredericks 0703-1603-99 mid-range single axis electrolytic tilt sensors and the 1-6200-013 16-bit UART/TTL signal conditioner. The use of high accuracy single axis sensors and 16-bit ADCs make this inclinometer ideal for high precision tilt measurement. This inclinometer has superior tolerances and unit to unit performance with an economic design, making it an excellent solution for many markets and applications.

Key Features and Benefits

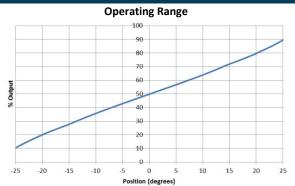

- ±0.005° repeatability, ≤0.001° resolution, very high accuracy
- ≤0.005° long term drift with an extremely long life
- Minimal drift compared to MEMS devices
- -40 °C to 85 °C operating temperature for industrial applications
- Live text and video chat technical support

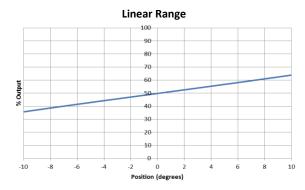

Applications

- · Geotechnical and structural monitoring
- Construction tools, laser leveling
- Construction machinery and equipment
- Medical devices

Operating and Linear Range Output Behavior

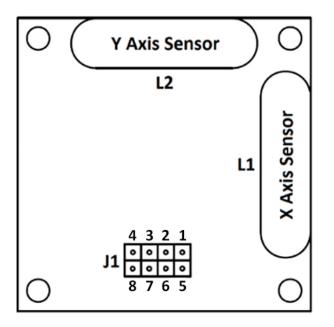

±25° UART/TTL Dual-Axis Inclinometer

Part Number: F225-00T-003-01

Electrical Connections		
Pin 1	Gnd	Ground
Pin 2	Vcc	Supply Voltage (+)
Pin 3	TX	UART/TTL Transmit
Pin 4	NC	No Connection
Pin 5	Gnd	Ground
Pin 6	Gnd	Ground
Pin 7	NC	No Connection
Pin 8	RX	UART/TTL Receive

UART/TTL Settings	
Baud Rate	9600 (default, selectable up to 115200)
Data Bits	8
Parity	None
Ston Rits	1

UART/TTL Commands	
'x' or 'X'	X axis output (0 to 65535)
'y' or 'Y'	Y axis output (0 to 65535)
't' or 'T'	Temperature output (0 to 1023)
's' or 'S'	Output X, Y, temperature at set intervals
'r' or 'R'	Stop timed interval output
'1' to '5'	Set delay (in seconds) for set intervals
'v' or 'V'	Product information and version
'B1'	Set baud rate to 9600
'B2'	Set baud rate to 19200
'B3'	Set baud rate to 38400
'B4'	Set baud rate to 57600
'B5'	Set baud rate to 115200
'?'	List all commands

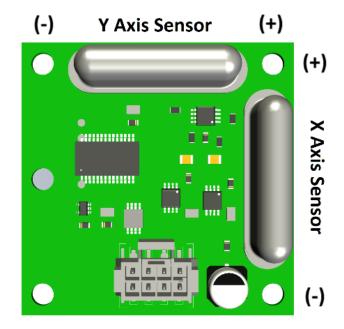

Converting Temperature Values

The board temperature output is a 10-bit value (0 to 1023). To convert that value to a temperature in °C, use the following equation:

Temperature in $^{\circ}$ C = (((output/1023)*5)-0.5)/0.01

Direction of Measurement

Mounting Notes

The F225-00T-003-01 and all inclinometers in this series must be mounted horizontally (parallel to the surface of the earth and perpendicular to the force of gravity). For best performance, isolate the unit from vibrations when mounting it.

±25° UART/TTL Dual-Axis Inclinometer

Part Number: F225-00T-003-01

Specialty Manufacturing Services That Promise Precision - Since 1935, The Fredericks Company has been a global provider and U.S. designer and manufacturer of the highest performance tilt and vacuum measurement products on the market, with manufacturing processes that ensure the reliability of our products.

Tilt Measurement Products and Sensors That Set Standards -

Fredericks' comprehensive tilt measurement product portfolio offers electrolytic tilt sensors, inclinometers, and tilt switches. Engineered to outperform competing technology, our tilt sensors are accurate and repeatable with excellent resolution. Our tilt measurement products have no planned obsolescence and serve industries ranging from construction and RV leveling to aerospace applications and everything in between.

A Partnership That Prioritizes Uptime, Lead Time, and Service -

Fredericks guarantees customer satisfaction and our "not too big, not too small" operation is what enables us to offer a true partnership experience. Our dedicated representatives and engineers offer exceptionally responsive service and the fastest lead times in the industry, knowing that uptime is the key to your success. With anytime access to our leadership team and solutions that enhance your products, you will feel the Fredericks difference.
